内容概述	荷兰立体房屋介绍 cube house

填空 10

1. as a function of village  
His design represents a village within a city

2. Each cub building' s shape like a tree  
The concept behind these houses is that he tries to create a forest by each cube representing an abstract tree; therefore the whole village becomes a forest.

3. on the top of bridge in central city  
The city of Rotterdam asked him to design housing on top of a pedestrian bridge and he decided to use the cubic houses idea.

4. he met the problem of finance

5. inside the house ... three pillars made of concrete  
The structure of the pole consists of three concrete pillars that have concrete block filling the space in between. As for the cube, the basic structure is concrete floor with concrete pillars. On top of this structure is something similar to a typical wood frame structure with wood stud framing and rockwool insulation. To protect the wooden frame and the insulation from exposure to the elements, they are covered with cement/wood fiberboards. To give the cube a nice appearance, zinc panels were used and complemented by double-glazed windows.

6. one Building between \*\*\* and school of architecture The houses contain three floors:

7. The lower level and top level are triangle-shaped  
Ground floor entrance-  
First floor with living room and open kitchen the medium level is

8. and a study (business) hall

9. Top floor which is sometimes used as a small garden  
The cubes are titled and sit on hexagon-shaped pole structures. The cubes contain the living areas, which are spilt into three levels. The triangle-shaped business.

10. 房子的居住者 in their one advantage of a convenient location and reasonable price yet with good facilities.
